

Todd Global Intrinsic Value Equity Income Review

	3Q 2014	Year to Date	1 Year	3 Year*	Since Inception (1/1/2011)
Global Intrinsic Value Equity Income (Gross)	-2.40%	5.98%	13.96%	19.47%	14.53%
(Net)	-2.55%	5.50%	13.27%	18.76%	13.85%
MSCI ACWI	-2.20%	4.16%	11.89%	17.24%	9.36%

* Annualized Total Returns. Please refer to the attached Performance Disclosure for further information

Global markets posted poor returns in the third quarter, with the ACWI index declining -2.2% while gaining 4.2% for the year. The Global Intrinsic Value Equity Income Strategy slightly underperformed the index during the quarter but outperformed the index on a year to date basis. Our performance over the longer time frames noted above is ahead of the index.

The leading markets during the quarter are noted in the graph on the left. Three of the four leaders were Emerging Markets during the quarter. Three of the four laggards are European. The US had a better experience, essentially up about 1% for the S&P 500. Much of the differential between markets was due to a surge in the dollar versus the Euro, Yen and Pound Sterling between July and September. Dollar strength occurred as a result of several events weighing on world sentiment. Russian backed separatists in the Ukraine shot down a Malaysian Airways jet in July, heightening tensions that have surrounded that conflict. Ensuing rhetoric has led to sanctions between Europe and the US on one side and Russia on the other. This has weighed on the visibility of European growth, provoked lower inflation in Europe and weakness in the German economy. In response to this, the ECB took extraordinary actions in early September, announcing further rate cuts, targeted LTROs and plans to institute purchases of bonds in the near term.

At the same time, Japan is struggling through a weaker quarter due to the recent increase in their Value Added tax. Additionally, the Bank of England and the US continued to their progress towards normalizing (read that as raising) their short term rates since their economies have recovered from the 2009 event. Economic growth is good for the US and UK and both unemployment rates have declined. Chinese growth has been spotty, with some measures showing mixed results. Concerns about slowing growth are rising as their real estate

market continues to soften. China has been unwilling to announce a wholesale stimulus program but they are implementing a number of targeted programs. We believe if growth gets any weaker, they would probably be forced to offer some broader stimulus measures.

Geopolitics came to the forefront of investors' minds as they wrestled with the Russian Ukrainian conflict, Israel and the Gaza Strip, fears of Scottish secession, Ebola spreading and more recently protests in Hong Kong. Equally important, but less noted are some key elections coming up in the US and Brazil. Another emerging problem is the newly formed ISIS group, which has taken over large swaths of Syria and Iraq over the past three months. The group was relatively unknown until after they had acquired half of Iraq.

It was not all bad news in the quarter. Purchasing manager indexes were pretty good for most of the quarter, and most are still indicating some expansion in manufacturing for most parts of the world. Additionally, earnings have been good and should be supportive of equities. Numerous mergers and acquisitions have occurred, indicating improved confidence among business leaders. Also, the quarter had record breaking IPO deals completed. All of these indicate to us that sentiment for business leaders is firming up.

In all, the quarter was a tug of war between rising geopolitical tensions, and economic data in the US being firmer. As tensions wore on during the quarter, economic activity began slowing in Europe and the recognition of this by the ECB sparked weakness in the Euro and Strength in the dollar. Japanese activity never really recovered from last quarter, sparking weakness in the Yen and strength in the dollar. The IMF lowered growth estimates, and many observers are worried about Europe slipping into recession again. That is why we expect the European Central Bank to pursue more aggressive Quantitative Easing programs.

We present the factors that added and detracted from performance for the TAM Global Universe in the quarter and most recent twelve months below.

TODD ASSET MANAGEMENT LLC GLOBAL INTRINSIC VALUE EQUITY INCOME COMPOSITE DISCLOSURE

Past performance does not provide any guarantee of future performance, and one should not rely on the composite performance as an indication of future performance. Investment return and principal value of an investment will fluctuate so that the value of the account may be worth more or less than the original invested cost.

Specific stocks discussed in this presentation are included solely as part of a review of the Composite's quarterly results and are not and were not recommendations for purchase or sale by investors. All or some of the specific stocks mentioned may have been purchased or sold by accounts within the Composite during the period, or since the period, and may be purchased or sold in the future. Investors should not construe the Composite's performance or any security as predictive of future results. A complete listing of the holdings as of the period end is available upon request.

Todd Asset Management LLC ("TAM") is a registered investment adviser. The performance presented represents a composite of public funds, corporate funds, IRAs, and high-net-worth individuals, invested primarily in large cap, high quality, attractively valued domestic and international equity securities with the objective to seek dividend income. A secondary focus is growth of income and capital appreciation.

Todd Asset Management LLC, formerly Todd-Veredus Asset Management LLC began operations on June 1, 1998 as Veredus Asset Management LLC (VAM). Effective May 1, 2009, VAM combined with Todd Investment Advisors, Inc. (TIA). TIA (and its predecessors) was founded in 1967 by Bosworth M. Todd. Upon the combination of VAM and TIA in 2009, Veredus Asset Management LLC changed its name to Todd-Veredus Asset Management LLC (TVAM). On February 28, 2013, TVAM redeemed ownership units held by individuals who supported the growth products founded under VAM, and changed its name to Todd Asset Management LLC. The firm continues to offer the same products and strategies managed by the same individuals and process founded under TIA

The Global Intrinsic Value Equity Income Composite contains fully discretionary, taxable, and tax-exempt accounts that use the MSCI ACWI (Gross) Index as the benchmark. All fee-paying, fully discretionary portfolios under our management are included in a composite. Accounts are eligible for inclusion in the composite at the beginning of the first calendar quarter after the month of initial funding and upon being fully invested.

TAM claims compliance with the Global Investment Performance Standards (GIPS®). The Firm has been verified for the period January 1, 2008 through March 31, 2014 by Ashland Partners & Company LLP and for the period July 1, 1989 through December 31, 2007 by a previous verifier. TIA's compliance with the GIPS® standards has been verified for the period January 1, 1993 through April 30, 2009 by Ashland Partners & Company LLP. In addition, a performance examination was conducted on the Global Intrinsic Value Equity Income Composite for the period January 1, 2011 through March 31, 2014. To receive a complete list and description of TAM composites and/or a full disclosure presentation which complies with the GIPS® standards, please contact TAM at 1-888-544-8633, or write Todd Asset Management LLC, 101 South Fifth Street, Suite 3100, Louisville, Kentucky 40202, or contact us through our Web site at www.toddasset.com.

The performance information is presented on a trade date basis, both gross and net of management fees, net of transaction costs and includes the reinvestment of all income. Net of fee performance was calculated using the applicable annual management fee schedule of 0.60% applied monthly. The currency used to calculate and express performance is U.S. dollars. All cash reserves and equivalents have been included in the performance.

The composite performance has been compared to the following benchmark (shown with dividends reinvested):

MSCI ACWI (Gross) Index is a float-adjusted market capitalization index that is designed to measure the equity market performance of developed and emerging markets.
